

SAI TEJA RAMACHARLA

ramacharlasaiteja@gmail.com | +91 9494605253 | LinkedIn | Hyderabad, India

SUMMARY

Full Stack Developer with experience building AI-powered applications and enterprise platforms using Java, Spring Boot, React, and cloud technologies. Passionate about Generative AI, Agentic AI, and intelligent systems, with hands-on experience integrating AI assistants, voice interactions, and modern AI workflows. Strong collaborator in Agile teams, experienced with Azure DevOps, Git workflows, and delivering scalable, secure, and maintainable solutions. Passionate about continuous learning and building impactful software systems.

EDUCATION

Executive Post Graduate Certificate in Generative AI & Agentic AI

Ongoing

Indian Institute of Technology (IIT), Kharagpur

Bachelor of Engineering in Computer Science

July 2020 – May 2024

Sri Chandrasekarendra Saraswathi Viswa Maha Vidyalya, Kanchipuram, Tamil Nadu, India

CGPA: 9.23/10

Course Work: Data Structures & Algorithms, Web Technologies, Operating Systems, Computer Networks, SDLC, DBMS, Artificial Intelligence, Machine Learning.

EXPERIENCE

Swiss Re

April 2025 – April 2026

Associate Application Engineer (Hybrid, Hyderabad, India)

- Worked across AI-driven frontend systems and enterprise backend integrations, contributing to scalable, secure, and production-grade solutions.
- Developed a Smart Insurance Assistant with a custom, branded frontend using React.js, TypeScript, and Tailwind CSS, supporting both text and real-time voice-based AI conversations.
- Integrated a Chainlit backend with a custom React UI and implemented 3D animated avatars using Ready Player Me and Three.js, synchronizing expressions with AI responses.
- Designed responsive chat layouts, optimized UI performance, and ensured consistent user experience across devices.
- Contributed to Datahub, an enterprise integration platform that serves as a centralized interface between consumers and external data vendors, handling structured and unstructured data (PDFs, HTML reports).
- Resolved 100+ SonarQube maintainability and security issues, improving overall code quality score from 80 to 90, and increased PIT mutation coverage from 78% to 90% by writing targeted unit tests.
- Supported backend development and integration using Java, Spring Boot, SQL Server, Docker, and API documentation/testing tools like Swagger.
- Collaborated closely with frontend, backend, and platform teams using Azure DevOps, followed Agile practices, and supported CI/CD pipelines, while actively managing Git workflows including feature branches, pull requests, and merge conflict resolution.

Tech Stack: Java, Spring Boot, React.js, Angular, TypeScript, Tailwind CSS, SQL Server, HTML5, CSS3, JavaScript, Node.js, Docker, Swagger, Bruno, Azure DevOps, Git.

Bharat Intern

Oct 2023 – Nov 2023

Full Stack Developer (Remote)

- Developed and deployed scalable software solutions using Java, Spring Boot, and REST APIs, ensuring high performance and maintainability.
- Designed a Content Management Tool to handle large datasets, optimizing scalability and accessibility.
- Built a Project Management Tool with seamless integration between front-end and back-end technologies.
- Acted as a key contributor in team discussions, solving complex issues, and delivering high-quality solutions within deadlines.

- Applied CI/CD pipelines to streamline deployment and testing processes.

Tech Stack: Java 8, Spring Boot, HTML, CSS, JavaScript, MySQL, Git.

PROJECTS

Bank Management System

Nov 2024 – Dec 2024

- Built a secure, scalable system for managing user accounts using Java and Spring Boot.
- Optimized SQL queries for efficient transaction processing, reducing response time by 30%.
- Core features: User authentication, transaction tracking, and account statement generation.

Tech Stack: Java, Spring Boot, Spring Web MVC, Spring Data JPA, Thymeleaf, MySQL.

Chatbot

Feb 2023 – May 2023

- Developed a Python-based chatbot serving as a virtual assistant for university stakeholders capable of text-based interactions.
- Integrated text-to-speech functionality to provide voice responses to users.

Tech Stack: Python, Flask, Machine Learning (Keras, Numpy), NLP (NLTK, WordNet Lemmatizer), Speech Recognition.

Speech to Text Web App

Aug 2023 – Dec 2023

- Developed a Python-based web application using Flask for transcribing speech from a microphone, audio, or video files.
- Implemented transcription saving and cleanup mechanisms for a seamless user experience.

Tech Stack: Python, Flask, MoviePy, PyDub, Speech Recognition Library, Google Web Speech API, JavaScript, jQuery.

TECHNICAL SKILLS

Languages:	Java, Python, C++, SQL
Frameworks & APIs:	Spring Boot, Hibernate, Servlets, JDBC, Microservices, REST APIs, React.js, Angular, HTML5, CSS3, JavaScript
Data Science & AI:	Generative AI, Agentic AI, NumPy, Pandas, TensorFlow, Natural Language Processing (NLP)
Cloud & DevOps:	AWS (Certified Cloud Practitioner), GCP, Azure DevOps, CI/CD Pipelines, Docker, Git
Databases & Tools:	MySQL, SQL Server, Visual Studio Code, IntelliJ IDEA, Eclipse, Swagger, Bruno

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** – Amazon Web Services (AWS) Feb 2025
- **Java Full Stack Development** – JSpiders Jan 2024 – Apr 2024
- **Software Engineering Job Simulation** – JPMorgan Chase & Co. Jan 2025
